CloudHSI
Services

HERITAGE SYSTEMS INC.
Delivering Liquid Solutions

MAKE YOUR DATA & EQUIPMENT WORK FOR YOU

CloudHSI is Heritage Systems' secure cloud platform that allows you to remotely monitor water quality, onsite equipment performance, and process data in real time from any web-enabled device

Key Features

Real-Time Monitoring
View live water quality and equipment performance from anywhere, 24/7.

Remote Access
Secure web portal accessible by computer, tablet, or smartphone.

Historical Data & Reporting
Store and analyze historical data for trending, reporting, troubleshooting, and regulatory compliance.

Stay Informed
Alarms and notifications can be sent via text message and email when system conditions change, helping you respond before small issues become costly problems

Monitor What Matters

CloudHSI can Monitor:

Ph ▪ Dissolved Oxygen ▪ Conductivity ▪ Tank, Pond and Lake level and volume monitoring ▪ Equipment run-time and proof-of-run monitoring ▪ Chemical delivery system performance ▪ Cooling Tower and Evaporative Condenser water quality ▪ Surface, ground, process and potable flow and level

Real-Time Monitoring • Secure Remote Access • Instant Alarms & Notifications
Historical Data & Reporting • Flexible Integration
